DR-XTC1

Transducerized Torque Control System

Real-time data collection

Intuitive & User friendly software

Endless rundown configurations

Dynamic job selection

Software included
No Additional Cost!

deltaOnpoint
DATA CONTROL SOFTWARE by Delta Regis

DR-XTC1

Transducerized Torque Control System
0.6 ~ 7 Nm (5 ~ 62 in-lbs)

[Take a look!](#)

Want to test is out on your application?

Take advantage of our free Test Drive program today!

[Email us to start your Test Drive](#)

The DR-XTC1 allows you to be in full control of your entire fastening process.

Easily setup multiple tightening parameters like speed, thread, direction & torque through the controller directly or via PC with deltaOnpoint software installed.

Create multiple jobs for different assembly stages and quickly switch between desired job dynamically.

Tightening data can viewed instantly in the deltaOnpoint software and can also

be stored locally on an SD card to avoid data loss due to untimely internet connectivity issues.

Multiple torque ranges available!

Choose the best transducerized DC driver to suit your application...

ESL-XTE3

0.6-3.0 Nm (5-26 in-lbs)
